Dear Hiring Manager,

I am writing to express my interest in joining your team as a Software Developer. I have 3+ years of experience building web applications, with a strong focus on frontend development and hands-on experience with backend development and APIs.

My primary stack includes JavaScript, TypeScript, React.js, Next.js, Node.js, and NestJS. I have worked with GraphQL and REST APIs, PostgreSQL and MongoDB, authentication, role-based access control, and business logic. In my current role at Akij iBos, I work on ERP modules including Procurement, Purchase Request, Purchase Order, Accounts, financial operations, authorization, and multi-level approval workflows.

Previously, I worked on POS and warehouse management systems at Easy Fashion Ltd, where I developed sales and sales return features, inventory-related functionality, keyboard shortcuts, and PWA features. I have also built a flight booking system using Next.js, NestJS, and the Amadeus API, along with other web applications and SaaS projects.

I enjoy working with existing codebases, solving problems, building user-friendly interfaces, and collaborating with developers, testers, and other team members. I am also comfortable learning new technologies and adapting to different project requirements.

I would appreciate the opportunity to discuss how my experience and skills could contribute to your team. Thank you for considering my application. I have attached my resume for your review.

Best regards,
Nadim Chowdhury
